**Atrium Launches New Vinyl Window Series**

*Series 120 is a full line of vinyl new-construction windows providing superior structural performance at a competitive price*

DALLAS – Atrium Companies Inc., one of the largest manufacturers of residential vinyl and aluminum windows and patio doors in North America, today announced the launch of the Series 120, a complete line of vinyl new-construction window products, including tilt-sash single hung, horizontal slider, picture windows and special architectural-shaped windows. The Series 120 vinyl window line is a targeted fit for the Southeast and South Central U.S. marketplace served by Atrium’s facility in North Texas.

“The new Series 120 features a tilt-in sash for easy cleaning and an aesthetically pleasing brick mould style frame that’s extremely popular across the nation,” said Tim Hanrahan, central region vice president of sales. “Atrium’s Series 120 vinyl new construction windows offer excellent energy efficiency and are available with a DP50 design pressure rating at a very affordable price.”

Atrium tests and certifies its window and door products for structural, air/water infiltration and forced entry performance standards in accordance with the AAMA/WDMA 101 North American Fenestration Standard/Specification for windows, doors and skylights.

The new Series 120 vinyl windows benefit from a built-in ‘J’ channel system that builders prefer because the design simplifies siding and brick installation. Windows are available in White, Almond and Clay frame colors.

To ensure Series 120 Windows provide building professionals with superior energy savings, high-performance Low-E glass is provided as an available option on the entire Series 120 premium new-construction vinyl window line. Additionally, Atrium’s new Series 120 line windows ordered with Low-E glass are Energy Star® compliant in all climate zones.

This new Series 120 is designed to be the ‘better’ in the ‘good, better, best,’ family of new construction window lines offered by Atrium for the Central U.S. market. The company’s vinyl new-construction window lines now consist of the Series 5700, the newly launched Series 120, and the higher-end Series 150/160 single hung and Series 450 double hung window lines featuring integral brick mould trim.

For more information on the Series 120 vinyl product line, contact Mark Gallant at Atrium, (214) 630-5757.

**About Atrium Companies, Inc.**

For more than 50 years, Atrium Companies, Inc. ([www.atrium.com](http://www.atrium.com)) has offered the highest quality window and door products to builders, contractors and distributors in the residential construction industry. Dedicated to meeting the needs of its customers, the Atrium family of brands provides a versatile range of window and patio door products, including vinyl and aluminum models, as well as replacement and new construction product lines.
