Atrium Extends Silent Guard® Acoustical Window Line

New vinyl casement and awning windows enhance the selection of noise suppression products for architects, builders and remodelers

DALLAS – Atrium Companies Inc., one of the largest manufacturers of residential vinyl and aluminum windows and patio doors in North America, today announced the extension of its Silent Guard® 7000 Series Acoustical Window line to include two new models of casement and awning windows. The Series 7500 Casement and 7600 Awning Windows combine superior acoustic performance with exceptional thermal efficiency, providing design professionals and contractors the widest available selection of vinyl sound suppression windows.

“Silent Guard Acoustical Windows represent cutting edge technology in residential vinyl sound control windows,” said Robert Burns, executive vice president and chief operating officer. “This technologically advanced window system, now completed by the addition of the casement and awning products, delivers exceptional value in noise suppression, outstanding thermal efficiency and years of maintenance free ownership, all backed by one of the strongest warranties in the business.”

Silent Guard Acoustical Windows are designed with an STC/EWR rating to meet a wide range of acoustical code requirements, enabling architects, builders and remodelers to deliver windows that affordably meet or beat their project’s desired noise abatement performance. With Atrium’s national presence and superior distribution systems, the company is able to deliver Silent Guard products to any market that needs a high-value, acoustic window solution.

To ensure that Silent Guard Acoustical Windows provide building professionals with superior energy savings, high-performance Low-E Glass is provided as a standard feature on the entire 7000 Series acoustical window line. Additionally, Atrium’s vinyl acoustical windows with Low-E Glass are Energy Star compliant in all climate zones.

Atrium tests and certifies its window and door products in accordance with AAMA/WDMA 101/1.S.2 Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors. Detailed product specifications, test reports and information on testing methods and reporting procedures are available upon request. Windows are available in White and Almond frame colors.
