

## INSTALLATION INSTRUCTIONS FOR YOUR NEW SOLID VINYL REPLACEMENT WINDOWS

### TOOLS NEEDED

Caulking Gun	Measuring Tape
Phillips Head Screw Driver	Chisel
Utility Knife	Electric Drill
Hammer	Premium Grade Sealant
Level	

### FROM INSIDE THE HOUSE

#### I. REMOVAL OF EXISTING WOOD WINDOW

1. Check new windows before you tear out opening. Make sure you have the correct amounts and sizes.
2. Carefully remove all inside trims or stops (you will reuse this material).
3. Cut bottom sash balance cord or chain and remove sash.
4. Remove the parting strips at the sides and top(s).
5. Cut top sash balance cord or chain and remove the sash.
6. Leave exterior stops (blind stops) intact and in place to prevent replacement window from falling through opening.
